

EDUCATION

Sri Eshwar College of Engineering	B. TECH(CSBS)	CGPA 8.51 (up to 5th Semester)	2023 - 2027
St. Joseph's Matriculation Hr. Sec School for Girls	HSC	93%	2021 - 2023
PSGR Krishnammal Hr. Sec School for Girls	SSLC	PASS	2020 - 2021

INTERNSHIP

Web Development trainee (MERN) - Better Tomorrow 2025

Technologies: React.js, MongoDB, Node.js, Express.js

Utilized the MERN stack to build a personal portfolio website, applying core web fundamentals to deliver a fully functional project. The experience strengthened my practical skills in design and development by creating responsive interfaces and scalable features, ensuring 100% responsive design across mobile, tablet, and desktop breakpoints. PROJECTS

NOOLAGA THOZHAN - Digital Library with Real-Time Chat [\[GITHUB\]](#) [\[LIVE\]](#) 2026

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT

Developed a full-stack digital library platform with JWT-based role authentication for users and librarians. Features include automated per-minute fine calculation via node-cron, a reservation queue that auto-assigns books on return, and category-based recommendations driven by each user's borrow history. Built a reader discovery system that matches users by favourite genre with real-time one-on-one chat using Socket.io and persistent message storage in MongoDB. Admin panel supports book management, borrow request approvals, and transaction tracking.

KIND & CRUEL - Social Initiative [\[GITHUB\]](#) [\[LIVE\]](#) 2026

Technologies: React.js, Node.js, Express.js, MongoDB, Nodemailer, Google Analytics

Developed a MERN stack positivity-sharing platform where color-coded physical cards with QR codes direct users to categorized quotes. Features include anonymous feedback, email subscription, and an admin dashboard for complete CRUD operations on quotes, subscriber management, and feedback tracking. Integrated Google Analytics for user interaction monitoring.

SKINSIGHTS - AI Skincare Ingredients Analyzer [\[GITHUB\]](#) [\[LIVE\]](#) 2025

Technologies: React.js, Node.js, Express.js, MongoDB, Hugging face API, Tesseract.js

Built an AI-powered skincare platform using Hugging Face to determine user skin type via a quick and interactive quiz. Enabled comprehensive ingredient analysis through text input or OCR, providing detailed safety scores for ingredients. Integrated personalized product recommendations, user analysis history, and an intuitive admin panel for managing suggested products and insights.
