Sri Eshwar College of Engineering	B.TECH (CSBS)	CGPA 8.37 (till 4th Semester)	2023 - 2027
St. Joseph's Matriculation Hr. Sec School for Girls	HSC	93%	2021 - 2023
PSGR Krishnammal Hr. Sec School for Girls	SSLC	PASS	2020 - 2021

INTERNSHIP

WebDevelopment trainee (MERN) – Better Tomorrow 2025

Utilized the MERN stack to build a personal portfolio website, applying core web fundamentals to deliver a fully functional project. The experience strengthened practical skills in design and development, demonstrating adaptability in creating responsive interfaces and scalable features. Focused on translating learning into tangible outcomes with a professional project showcasing proficiency in modern web development.

Tech stack learned: React JS, Mongo DB, Node JS, Express JS.

PROJECTS

FINSIGHT- FINANCE DASHBOARD [[LIVE](#)] 2025

Technologies: React, MUI, Node.js, MongoDB, Recharts, ML

Developed a full-stack financial dashboard with interactive visualizations, KPI tracking, and ML-based revenue and expense predictions. Integrated an auto responsive AI chatbot for real-time business insights and user guidance.

DORYBITES – Food Ordering Platform [[GITHUB](#)] 2025

Technologies: MongoDB, Express, React and Node(MERN), Stripe

Designed and developed a responsive food ordering and delivery web application to explore MERN stack capabilities. Implemented features including menu browsing, cart management and order placement, delivery status management, and Stripe payment integration. Included an admin panel for efficient order management. Focused on state management, modular component design, and secure transaction flow.

TRAWBS – COMPATIBILITY CHECKER GAME: [[LIVE](#)] 2025

Technologies: React.JS, Google Analytics

Built an interactive, single-tier compatibility checker game using React.js. Developed custom UI components to deliver a personalized and engaging user experience. Integrated Google Analytics to monitor user engagement and behavioral metrics.

EXPENSE TRACKER: [[GITHUB](#)] 2024

Technologies: Java, SQL

Developed a fully functional console-based expense tracker application. This application allows users to track and manage their daily expenses. The project focuses on understanding core concepts of Java and SQL, including database interactions, CRUD operations, and implementing user input handling.

CERTIFICATIONS [[LINK](#)]

Mastering of Java Programming	Udemy	2024
Data Structures and Algorithms using C and C++	Udemy	2023
The Joy of Computing Python	NPTEL	2023

ACHIEVEMENTS

Participated in Synergy Hackathon 2024 (PSGR Krishnammal College for Women)

Secured a place among top 20 in Full Stack dev challenge (College level)

Leet Code: Problems Solved:120+ | **Max Rating:** 1618 | [Profile](#)

Hacker Rank: Problems Solved: 50+ | [Profile](#)

Skill Rack: Problems Solved:400+ | [Profile](#)

Code Chef: Problem Solved:118 | [Profile](#)

SKILLS

Languages: C, C++, Java, Python, HTML, CSS, JavaScript

Libraries/Frameworks: ReactJS, NodeJS, ExpressJS

Tools/Platform: Git, GitHub, VSCode, Excel, Postman, Eclipse, REST APIs

Database: MySQL, MongoDB

Core: Data Structures and Algorithms, OOPs, DBMS, OS, Networking
